Hemp Food Innovations
for more health & performance

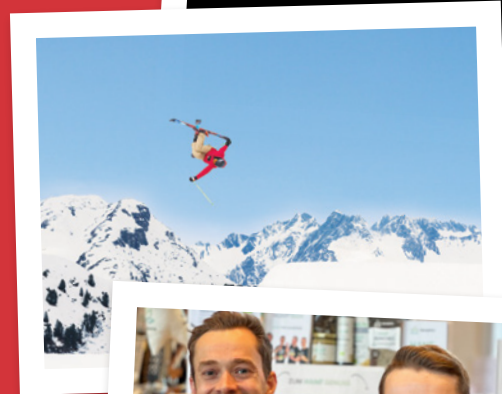

HEMP - the hidden CHAMP

From athletes to hemp pioneers

We, Florian and Fabian Braitsch, are brothers and come from the Austrian Alps. Already during our careers as professional athletes, we were constantly concerned about nutrition, and since our childhood we share a passion for good food.

From the day of our foundation in 2018, we have been working passionately to make a contribution to a healthier and more sustainable future with innovative foods made from hemp seeds.

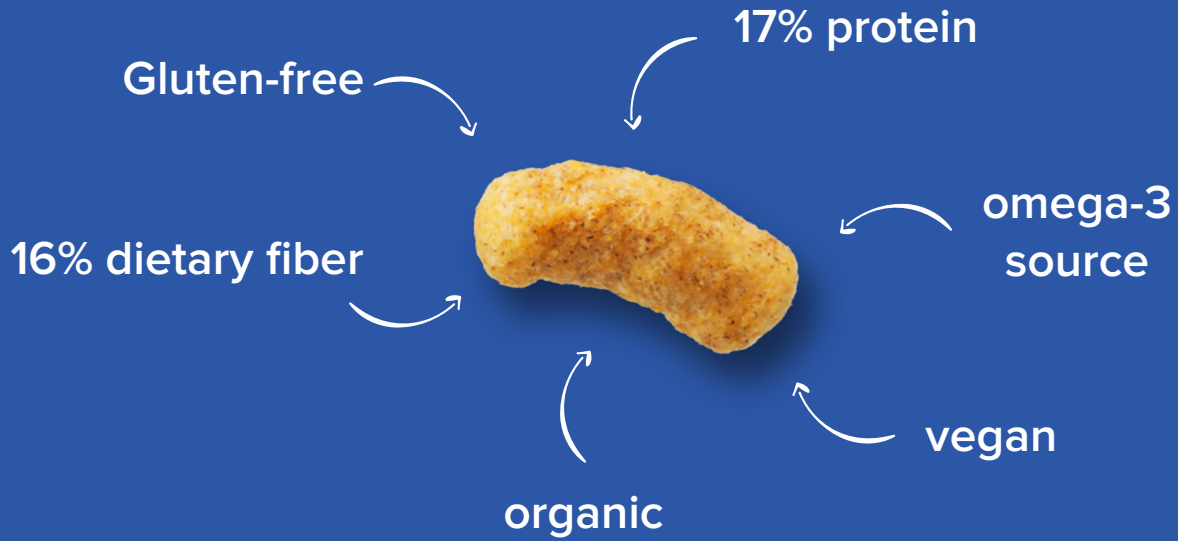

Hemp innovations for the mainstream

Hemp seeds are the hidden champion among foods. They combine high quality protein, valuable omega-3 and minerals in one. Both in terms of nutritional value and sustainable cultivation, they outperform nuts and animal protein sources.

The problem: the existing hemp seed products on the market are complicated and often do not taste good.

This is exactly our strength: we develop hemp food innovations that taste good, are easy to use in everyday life and convince with top nutritional values.

NEXT LEVEL snacking
