About VITUS VITALITY

Saint Vitus (St. Veit), the patron saint of mushrooms, brings us productive harvests of fine Vitus organic mushrooms every day. 100% organic, sustainable and carefully produced in the heart of Lower Austria, harvested and packaged by hand, our fine mushrooms reach the markets and kitchens in the region fresh and in the best quality.

Mushroom production from Austria **Transparency of origin & key facts from the** **Austrian production facility.**

100% pure & uncontaminated

through state-of-the-art indoor production in Lower Austria:
The weekly volume is 5 tons in so-called culture chambers.

100% ecologically fit

for the future thanks to the use of sustainable resources and therefore
almost CO2 neutral innovative indoor production.

100% sustainable circular economy

in a modern cultivation atmosphere: a breeding ground for our fine mushrooms
is sawdust and sawdust from wood production. After the harvest
the substrate is composted and returned to nature as humus.
